

DEPULS+

DePuls+ is the device for express screening of a body's resources as per physiological and psycho-emotional signs. The unit is a user-friendly device that can be used both in recreation centers and at home to estimate the state of the bodies of the whole family. DePuls+ displays results with the help of vivid visualization which is clear not only for doctors but also for ordinary people who take care of their health. The testing itself lasts not more than 5 minutes. Several profiles, to be used by different people, can be set-up for a more effective estimation of a body's health.

DEPULS+ SPECIAL FEATURES

DePuls+ is the perfect choice for business development and for regular use by all members of a family. Well-timed screening of a body's state will help to preserve energy, youth and working efficiency.
